UNREASONABLE HARDSHIP DETERMINATION FOR COMMERCIAL ALTERATION PROJECTS

Policy and Procedure :B

January 2011

When the total construction cost of **alterations, structural repairs or additions to existing buildings** and facilities does not exceed a valuation threshold of approximately **\$132,536.28** based on "ENR US20 Cities" average construction cost index of 7660.29 (Engineering News-Record, McGraw Hill Publishing Company), and the enforcing agency finds that full compliance with the requirements for disabled access upgrades serving the area of alteration, structural repair, or addition creates an "unreasonable hardship", an exception can be granted by the enforcing agency to allow for less than full compliance for the upgrades.

To be considered for such a determination, please complete the "*Application for Unreasonable Hardship Exception to Disabled Access Requirements*" requesting a determination. Note that such a determination is not a blanket exemption but, rather, limits the required cost of accessibility upgrades to 20% of the cost of your project on items in the following order of priority (as detailed in the 2010 California Building Code Section 1134B.2.1, Exceptions 1). In choosing which accessible elements to provide, priority should be given to those elements that will provide the greatest access in the following order:

1. An accessible building entrance and an accessible path of travel to this entrance from either the public sidewalk or the disabled parking stall.
2. An accessible route of travel from the accessible building entrance to the area of alteration, structural repair, or addition.
3. At least one accessible restroom for each sex serving the area of alteration, structural repair, or addition.
4. Accessible telephones, if provided, serving the area of alteration, structural repair, or addition.
5. Accessible drinking fountains, if provided, serving the area of alteration, structural repair, or addition.
6. When possible, additional accessible elements such as parking, storage and alarms.
