### **Department of Water Resources Recommends the City Receive \$4.6 Million Grant**

**Lodi, CA** – The Department of Water Resources is recommending the City receive a \$4.6 million grant to construct a groundwater charging facility at the White Slough Water Pollution Control Facility, which will have multiple benefits for the City and region. Not only will the groundwater recharge replenish the aquifer, it will keep brackish water from migrating east and result in no need for the City to discharge wastewater into the Delta. A public hearing on the recommended project awards is scheduled for Sept. 2 in Sacramento, and comments are due Sept. 5.
